

# Web Design

## Laboratory exercise #3

### Assignment #1

You need to create a HTML 5 website which will have the same design as as depiced in the figure below.

#### 1. index.html

The width of the whole page is: 800px and the height 600px

Height of the menu is: 30px, with a padding of: 4px

The list for the menu needs to have a margin-left of: 120px;

Font size is: 18px

Height of the picture in the top left corner: 120px

Color of the text in the menu is: #ffffff (white)

The cells that are located inside the menu need to have the following CSS styles:  
margin: 0; padding-left: 10px; padding-right: 10px; display: inline; text-align: center;

The middle part (content) has a height of: 420px

The Color of the title: #92CD00

Size of the font in the title: 26px [style=""font-size:26px;"]

Color of the text in the content: #192402

Style of the text in the content: bold

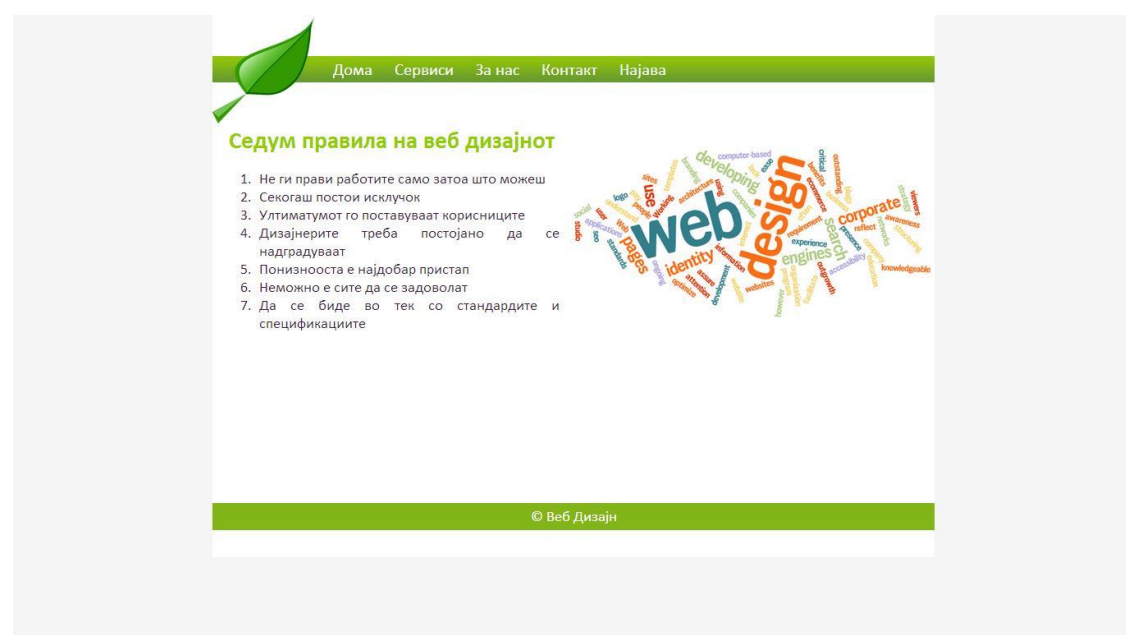

Height of the footer: 30px

Color of the text in the footer: #ffffff

Background color of the footer: #81b518

## 2. servisi.html

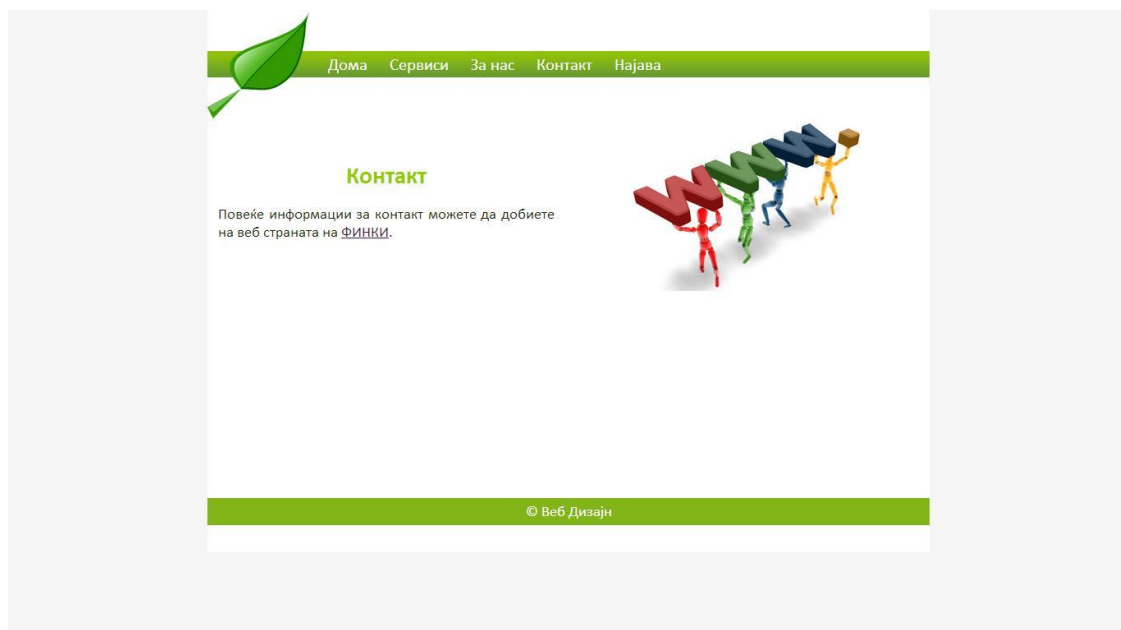

Everywhere in the following pages where there are elements that are repeated from the index page, should have the same attributes as the ones in the index page.

### 3. zanas.html

### 4. kontakt.html

## 5. najava.html
